Success Story New Construction

Greenleaf Biofuels, LLC.

30 Waterfront St, New Haven, CT 06512

Project Overview

Greenleaf Biofuels, LLC., situated at 100 Waterfront Street in New Haven, CT, proudly operates the largest biodiesel facility in New England. This state-of-the-art facility is designed to produce over 10 million gallons of biodiesel annually, using recycled waste materials to create a cleaner-burning renewable energy source.

The Challenge

In a rapidly evolving energy landscape, Greenleaf Biofuels aimed to establish a facility that not only met the growing demand for sustainable energy but also enhanced energy independence. With the goal of beginning fuel conversion by Fall 2012, the project required meticulous planning, execution, and coordination to address various logistical challenges, including site selection and infrastructure development.

Success Story: Greenleaf Biofuels, LLC.

The Solution

Munger Construction was selected as the trusted partner for this ambitious project, collaborating closely with founder Gus Kellogg. Together, they identified the optimal waterway location at New Haven Terminal for the facility, ensuring seamless access to necessary resources. Munger Construction expertly managed the site work and construction of an 8,000-square-foot Varco-Pruden pre-engineered steel building, incorporating essential infrastructure to support tank farm equipment and utilities.

The Impact

This biodiesel facility not only symbolizes a significant step towards energy independence but also represents a commitment to environmental sustainability. By utilizing recycled waste materials, Greenleaf Biofuels plays a pivotal role in reducing carbon emissions and promoting a cleaner environment. The successful completion of this facility stands as a testament to the effective collaboration between Greenleaf Biofuels and Munger Construction, showcasing innovation and dedication to advancing renewable energy.

Conclusion

Greenleaf Biofuels, LLC has positioned itself as a leader in the biodiesel industry, demonstrating that sustainable practices can be both economically viable and environmentally beneficial. The partnership with Munger Construction exemplifies the power of collaboration in achieving ambitious goals, paving the way for a cleaner, greener future.

Our Core Competency:

Building Long Lasting Relationships With Customers and Partners.

We Add Value From Start to Finish:

Convenience, Advice, Integration of High-quality Products, Design/Build Services, Support.

No Shortcuts:

Built to the Highest Structural Standards Without Compromising Integrity, Quality or Professionalism.
