

MUNGER

Featured Projects

Warehousing & Distribution Facilities

Munger creates operationally cost effective, state of the art facilities that significantly improve the customer experience for warehouse, distribution and logistics customers. Architecturally pleasing pre-engineered steel buildings are ideal for this application.

Carwild Corporation

3 State Pier Road, New London, CT

A multi-purpose addition serves to expand warehousing and office space.

- New Construction
- 40,000 SF Varco Pruden pre-engineered steel building
- Specialized clean room application area
- Second floor architecturally pleasing balcony overlooking New London Harbor

John DeGrand & Sons

430 Island Lane, West Haven, CT

High ceiling warehouse addition seamlessly tied into existing facility.

- New Construction
- 43,000 SF Varco Pruden pre-engineered steel building
- 40 ft. tall ceilings to accommodate high rack storage
- Complimenting two-color paneling scheme creates aesthetically pleasing finish
- Full height interior metal wall paneling for additional building durability

R&R Freight Services

49 Fowler Road, North Branford, CT

State-of-the-art warehousing and freight transfer facility enables operational cost efficiencies.

- New Construction
- 20,000 SF Varco Pruden pre-engineered steel building
- Narrow-aisle laser guided fork lift system maximizes storage capability
- State-of-the-art loading docks optimize freight transfer times

The Munger Advantage

Munger applies warehouse and distribution center design-build principles so that customers may earn the highest ROI on their investment. We influence the facility's size, layout, structural composition, lighting, and provisions for specialized equipment. The goal is to optimize organization, efficiency, safety, collaboration, productivity, operating costs, and working environment along with prioritizing the free flow of materials over storage capacity and keeping manual handling of products to a minimum.

Specialty Lighting Group

74 Pickering Street, Portland, CT

An outdated manufacturing facility transformed into centralized warehousing and office location.

- Building Renewal
- Complete interior fit-out features new offices, conference rooms, break room and bathrooms
- New exterior facade provides modernized appearance
- Connected office area and warehouse facility enhances company efficiency

Build The Best - Be The Best
