Project Overview

Munger Construction partnered with Doncasters to build a 19,750 SF addition to the Doncasters Precision Casting facility in Groton, CT. The project includes a 140' x 130' pre-engineered metal building (PEMB) with a 40' x 140' mezzanine, aimed at doubling the facility's manufacturing capacity to meet increased aerospace industry demand.

Build The Best - Be The Best

Success Story: Doncasters

Challenge

With passenger flying hours rebounding to or exceeding pre-pandemic levels, demand for aircraft parts outpaced the manufacturing capacity. Doncasters needed to expand quickly to meet orders for commercial airlines, reduce lead times, improve operational flow, and ensure safety.

Solution

Munger Construction designed and began constructing an extensive addition with optimized space for de-waxing processes, a new mezzanine, and improved parts flow. The facility layout was adjusted to reduce environmental impact and allow for streamlined production.

Result

The expanded facility is projected to double Doncasters Precision Casting's production capacity by 2025. This development supports future technological advancements and local job growth in Connecticut, positioning Doncasters to deliver consistent service to OEMs in the aerospace sector.

Our Core Competency:

Building Long Lasting Relationships With Customers and Partners.

We Add Value From Start to Finish:

Convenience, Advice, Integration of High-quality Products, Design/Build Services, Support.

No Shortcuts:

Built to the Highest Structural Standards Without Compromising Integrity, Quality or Professionalism.
